# WHOLESALE TRADE LIST

SPRING  
1907

## VIEW OF OUR OFFICE AND PACKING HOUSE

Our new storage house, capacity eight car loads, is located immediately back of and adjoining the packing house. It is thoroughly up to date. All stock stored with roots in sand. No opportunity for roots to dry out. Everything as fresh as stock dug from the open ground. The house being kept at an even temperature—just above freezing point—the stock is kept in dormant condition throughout the packing season. Careful experiments demonstrate that this is the most successful and perfect method of storing nursery stock.

We guarantee satisfactory service and first quality stock in all business entrusted to us.

# Wholesale Trade List

SPRING 1907

**I**N preparing this, our Wholesale Trade List for Spring 1907, we have aimed to present our large collection of Hardy Ornamentals to the purchaser in the most concise form. With this object in mind and in view of the fact that it is intended for the trade, illustrations and descriptions have been purposely omitted. To those unacquainted with the stock, however, we will gladly furnish descriptive matter upon application. In fact, we delight in giving information pertaining to Hardy Ornamental Plants and inquiries are solicited.

**Customers** are requested to state the mode of conveyance by which they desire their trees forwarded. When no route is named we forward to the best of our judgment.

**Responsibility**—After goods are placed on board cars here we assume no responsibility for their safe or prompt delivery, or any injury caused by delay in delivery by the transportation company.

**All Claims** must be made upon receipt of goods.

**Terms Cash**, on or before delivery to express or railroad agents, unless by special arrangement.

**Two Hundred and Fifty**, twenty-five and five will be furnished at the thousand, hundred and ten rates respectively.

**Packing Charged Extra**, but only sufficient to cover cost of time and material.

**Post Office Orders payable at Dreshertown, Montgomery Co., Pa.**  
**Telegraph Office, Ambler, Pa.**

**Visitors** are always welcome and should take train at the Reading Terminal, 12th and Market Streets, Philadelphia, for **Camp Hill Station**, or at Broad Street Station, Pennsylvania R. R., for **Fort Hill Station**. Be sure that the train you take stops at these stations.

**Notice.**—It is necessary that you should **Telephone** us (Bell Phone, 226 Ambler; Keystone Phone, 76-Y Jenkintown), in advance of your coming, so that we can send a carriage to the station for you. Our office is  $2\frac{1}{2}$  miles from either station.

[COPY OF CERTIFICATE]

## THE COMMONWEALTH OF PENNSYLVANIA

### DEPARTMENT OF AGRICULTURE

#### Certificate of Inspection of Nursery Stock No. 901.

This is to certify that the stock in the nursery of **THOMAS MEEHAN & SONS, INC.**, of Dreshertown, County of Montgomery, State of Pennsylvania, was duly examined in compliance with the provisions of the Act of Legislature of Pennsylvania, approved the 10th day of June, A. D., 1901, and it was found to be apparently free from San Jose Scale and other dangerously injurious insect pest or pests.

This Certificate expires July 31, 1907.  
Dated Harrisburg, Pa., Sept. 15, 1906  
THOS. C. LE FEVRE, Inspector.  
Inspected Sept. 5th, 1906.

*A. B. Critchfield,*  
Secretary of Agriculture.

# Deciduous Trees

"Trans." signifies the stock has been once or more transplanted.

Where stock is marked "Specimen" it indicates trees that have been several times transplanted, of good shape, straight stems, and have been grown especially for individual specimen trees.

## JAPANESE MAPLES

All of the Japanese Maples offered by us are of our own propagation. Customers who have planted them side by side with the rough, hide-bound and poorly rooted imported Japanese plants quickly recognize the merits of our home-grown stock. It is worth the little additional price charged over the imported stock. Note that many of the plants offered are pot grown. They transplant more easily by handling them in that way. All field-grown stock has been frequently transplanted.

<b>Acer Japonicum, Green-leaved</b>			
18 to 24 in. field grown.....	10 00		
2½ to 3 ft. field grown.....	15 00

## OAKS

We believe we are the largest growers of Oaks in the United States, and we feel sure that there is no finer stock growing anywhere. Our soil seems particularly adapted to the growth of the Oak. Our trees are well furnished, with bushy heads, and good straight stems. They are stocky and have the best of roots. We get practically no tap root, and in digging we do not allow our men to cut the roots,—they are taken out with the whole root. Note the heavy specimen trees which we offer. They are something extra fine, and where a large, well-developed specimen is required, nothing better could be gotten.

# Deciduous Shrubs

"Trans." indicates that the plant has been once or more transplanted.

Shrubs marked "Specimen" are large, well-developed plants that have been several times transplanted and given room to develop.

This is exceptionally fine stock for planting for immediate effect.

We have a large and fine stock of the <i>Berberis Thunbergii</i> . Our plants are good and bushy, not the slim, spindly plants usually offered, which, while they have the height, are not nearly so bushy as our stock.

3 year, 5-inch pots.....	2 25	20 00	

The Desmodium is an excellent plant of an herbaceous character for setting in shrubbery beds. It blooms in August and September. Being of an herbaceous character the tops die to the ground in the fall and shoot up in the spring stronger than the year previous. It is remarkably attractive, and is one of the most valuable plants of this character.

2 to 2½ ft. trans.....	8 50	75 00	
2½ to 3 ft. trans.....	12 50	110 00	

This is a new variety of the variegated leaved Althaea, the foliage showing the white and yellow variegation of the old variety, but which differs from the old variety inasmuch as the flowers open wide, and in a strong vigorous plant they are about four to five inches in diameter, while on the old variety the flowers do not open at all, but look like purple buttons.

The flower is of a purplish red color, single, and the plant blooms profusely.

This new variety of our common garden Althaea will be found perfectly hardy everywhere the old variety has proven so.

In many parts of the United States and Canada, Box Edging is not hardy, and a low, dwarf and compact plant is required as a substitute for it. The *Viburnum opulus nanus* has been found to be an excellent substitute for the Box Edging. It is naturally of a dwarf habit and will stand a lot of shearing, so that it can be kept down to a very small size. It does not bear any flowers and the leaves are smaller than the other varieties of *Viburnum*. It is perfectly hardy and can be planted in any part of the United States and Canada.

5 to 6 ft. trans. specimens.....	2 50	20 00	

The *Viburnum tomentosum* is of a similar character and habit to the *Viburnum plicatum*, but instead of having balls of flowers, they are flat headed. In leaf and general growth it is about the same as the *plicatum*, and in fact it is frequently mistaken for that variety. It is perhaps a little stronger grower than the *plicatum*, and in some respects it is to be preferred. We have a particularly large and fine stock of this plant, and call attention to some of the specimen plants which we offer.

## Evergreens

All our evergreens have been once or more transplanted, the larger sizes several times, and the choice varieties we move in a period not exceeding two years. These choice varieties are all dug with a ball of earth and the ball sewed in a mat. This makes transplanting almost an assured success. Our evergreens should not be confused with the low-priced plants frequently offered. We move them constantly in order to secure a good root growth, and they are less liable to loss when shipped.

# Vines and Climbers

We direct particular attention to our "Pot Grown Vines." They are well-established plants, strong, vigorous and well grown. They are shipped without breaking the ball. The best results are obtained from using potted plants. Potted plants are especially recommended for planting in the late spring and summer, rather than field grown stock.

## A FEW ILLUSTRATIONS OF OUR SPECIMEN EVERGREENS

### IMPORTANT

We desire to call particular attention to our Evergreens, because we have given them especial attention in their growth and every tree is a specimen, and no matter what size tree you may order, you will receive a specimen tree of that particular size.

The illustrations are from photographs of the trees as they are standing in the nursery rows—they represent an average tree—not one especially selected to illustrate because it is the finest tree in the block, but an average tree to show you as truthfully as possible just what kind of a tree we will send you.

Note also that the specimen trees offered will be dug with a ball of earth and the ball sewed in burlap. This is the only safe and satisfactory method of transplanting large evergreens—particularly in the fall.

**PERSONAL INSPECTION SOLICITED**

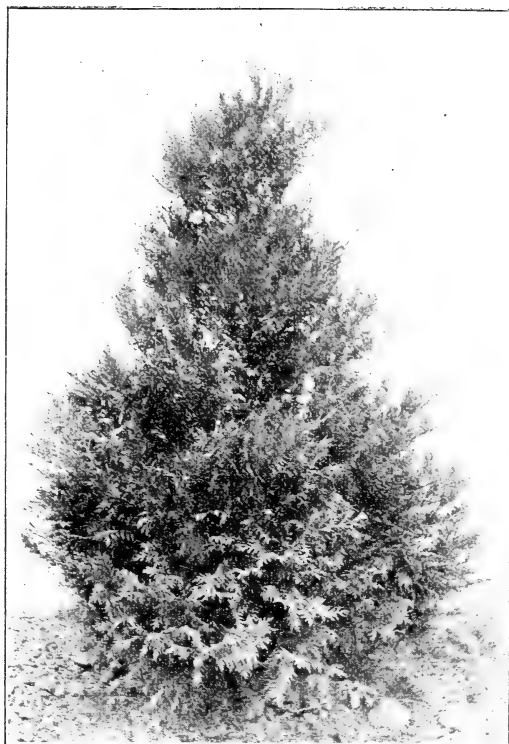

***Picea excelsa inverta***

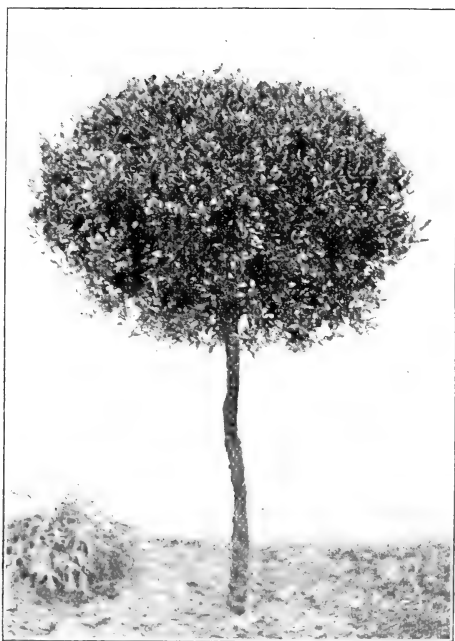

***Thuya occidentalis* Geo. Peabody**

***Retinispora pisifera aurea***

# Nurserymen's Supplies

## THE BEST NURSERY SPADE

Either Square or Taper Blade

Send Your Order Now. Don't Leave It Too Late

D Handle, Double Strap, Reinforced Nursery Spade. Weight, 9½ lbs.

We have experimented with a number of different makes of nursery spades, but find this to be the strongest, best and most durable on the market. We have been using this spade for a number of years, and it will stand more hard work than any other make. It is strapped full length of handle, both back and front, and half way up it has double straps, strengthening it in what otherwise would be its weakest parts. When ordering state if straight or taper blade is wanted. Price, \$1.75 each; \$20.00 per doz.

## PRUNING SHEARS, BUDDING AND PRUNING KNIVES

The sheers and knives offered, excepting the "Empire," are the celebrated "Maher & Grosh" make, which is sufficient guarantee of their excellence. No better knives are made. All blades are guaranteed "razor steel" and have been thoroughly tested.

Bear in mind, our prices are for the goods POSTPAID at your risk. If you wish them by registered mail add eight cents to your order.

### PRICES INCLUDE POSTAGE

**Pruning Knife "A,"** . . . . . 75c. each, 6 for \$3.75

This is the best light-weight pruning knife on the market, and is suited to all general work. Ebony handle.

**Pruning Knife "B,"** . . . . . 85c. each, 6 for \$4.75

Round handle, steel cap on end. Strong blade. Made for nurserymen who want a strong tool and keen edge. Blade oil tempered. The strongest pruning knife made.

**The "Empire" Budding Knife,** . . . . . 80c. each, 6 for \$4.50

We warrant it. This is the finest budding knife on the market. Made expressly for us, and we warrant every knife to be first-class. Blade closes. Best razor steel. All ivory handle, tapered at end for raising the bark. If you want a good, durable budding knife, buy the "Empire."

**Budding Knife "C,"** . . . . . 25c. each, 6 for \$1.30

Stationary blade. High temper, equal to any razor.

**Budding Knife "D,"** . . . . . 35c. each, 6 for \$2.00

Cocoa handle, razor steel. Blade closes. The end of the handle is tapered to form a wedge for raising the bark.

**Pruning Shears "E,"** . . . . . 75c. each, 6 for \$3.90

These are A No. 1 in quality and are the kind in general use

**Pruning Shears "F,"** . . . . . \$1.00 each, 6 for \$5.75

This is a forged steel pruner, patent spring of wonderfully easy but powerful working capacity. There is not a stronger or better pruning shear on the market. It will out-wear two of any other style. The best is the cheapest in the end.

## RAFFIA. RED STAR BRAND

1 lb. . . . .	15 cts. per lb.
1 lb (postpaid) . . . . .	30 " "
25 lbs. . . . .	10 " "
50 lbs. . . . .	9½ " "
100 lbs. . . . .	9 " "
1 bale (about 225 lbs.) . . . . .	8½ " "
2 bales . . . . .	8¼ " "
5 bales . . . . .	8 " "

Order "Red Star" brand and you will get raffia of a good, even grade. No risk attached for we replace any that proves inferior. Fair, is it not? Ask for sample. We'll pay the postage.

### **Hibiscus Syriacus Meehani Variegata**

(New Single-flowered Variegated-leaved Althæa.)

**T**HE old variegated-leaved Althæa is one of our best shrubs where a plant with colored foliage is required, but unfortunately the flowers do not open, consequently the general flowering effect is lost.

This new variety far surpasses the old form in as much as the flowers, though single, open completely, and the color, which is of a purplish red, makes a strong contrast to the yellowish white variegation of the foliage.

Visitors to our nurseries declare this to be one of the best introductions in the horticultural field in recent years, and we have already booked numerous orders from those who have seen the plant growing on our grounds.

The above illustration shows the free-blooming character of this plant. The flowers are larger than the other varieties of Althæa. The plant is as hardy as the old variegated-leaved form.

This will doubtless be a profitable plant for all nurserymen, dealers and agents to handle. Illustrated circulars and colored plates will be furnished to those in the trade at prices below cost. Half-tone illustrations in various sizes, both small and large, suitable for use in catalogues will be furnished without cost to customers who order plants from us.

Sample colored plates, circulars and proof of these half-tone cuts, also terms on same will be sent upon application.

For sizes and prices of plants see page 17 of this catalogue.
